

Proper handwashing doesn't stop with scrubbing. Wet hands can spread up to 1000X more bacteria than dry hands¹.

Dry thoroughly and confidently with a HEPA-Filtered hand dryer.

Follow CDC's guidelines for clean hands.

1. WET

2. LATHER

3. SCRUB

4. RINSE

5. DRY

Reduce cross contamination with touchless operation.

Dry hands with cleaner air. HEPA filtration captures 99.97% of particles 0.3 μm or larger from airflow.

Thoroughly dry your hands with fast dry time.

¹ Residual moisture determines the level of touch-contact associated bacterial transfer following hand washing. University of Auckland, Auckland, New Zealand, 1997

Adopted from the Centers for Disease Control and Prevention handwashing guidelines.
